

ABANDON THE GOOD SHIP WINDOWS 8?

WHY WOULD ANYONE DO THIS?

Lorrin R. Garson
OPCUG & PATACS, June 15, 2013

Three Rhetorical Questions ...

2

Is the Good Ship “Windows 8” Sinking?

3

Perhaps Just Listing to Starboard?

4

Or Is Opportunity Knocking?

5

Olli
Opportunity →

Stay Tuned...

6

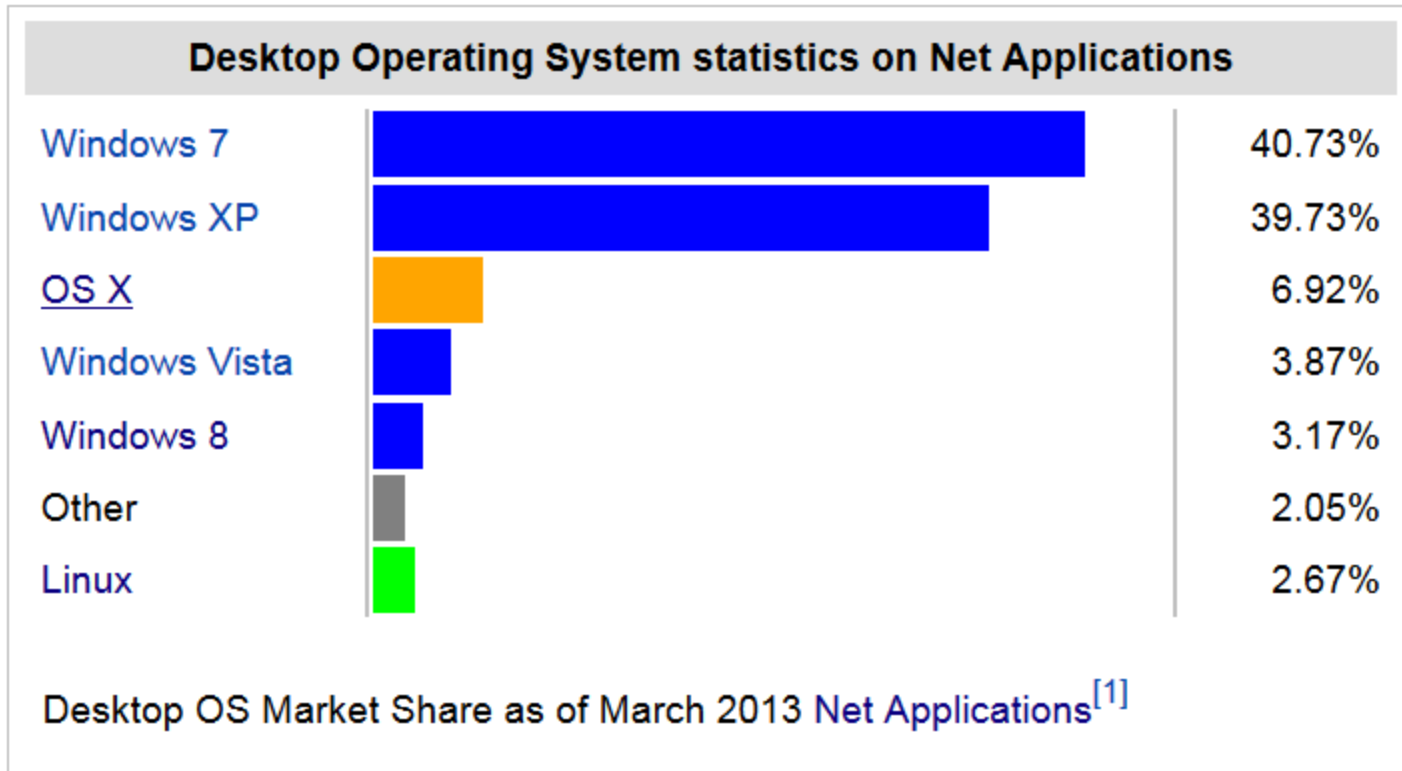

A Quick Survey...

7

- How many are using Windows 8?
- Windows 7?
- Vista?
- XP?
- Any Windows older than XP?
- Some distribution of Linux?
- Some version of Apple OS?
- Other?

Desktop Market Share*

Windows 8 is Controversial

10

Getting Emotionally Twisted Up...

11

Let's Suspend Our Emotions... For An Hour

12

Hang in there!

Or as the Brits say...

13

**KEEP
CALM
AND DON'T GET YOUR
KNICKERS
IN A TWIST**

Operating Systems I have Loved and Hated

14

- AMOS (Alpha Microsystems; 1978)
- DOS (1982)
- Windows
 - ❑ Windows 2 (1987), Windows 3 through Windows 7
- Unix
 - ❑ DEC VAX Ultrix (1980's)
 - ❑ Sun Solaris (1990's — 2000's)
- Apple
 - ❑ Mac System Software (mid-1980's) through System 9
 - ❑ OS X Mountain Lion (April 2013)

Windows 8's Vices & Virtues

15

Virtues

- **Improved performance**
- **Improved security (Security Essentials)**
- **Support for touch screens**
- **Uses less power**
- **Improved storage management (Storage Spaces)**

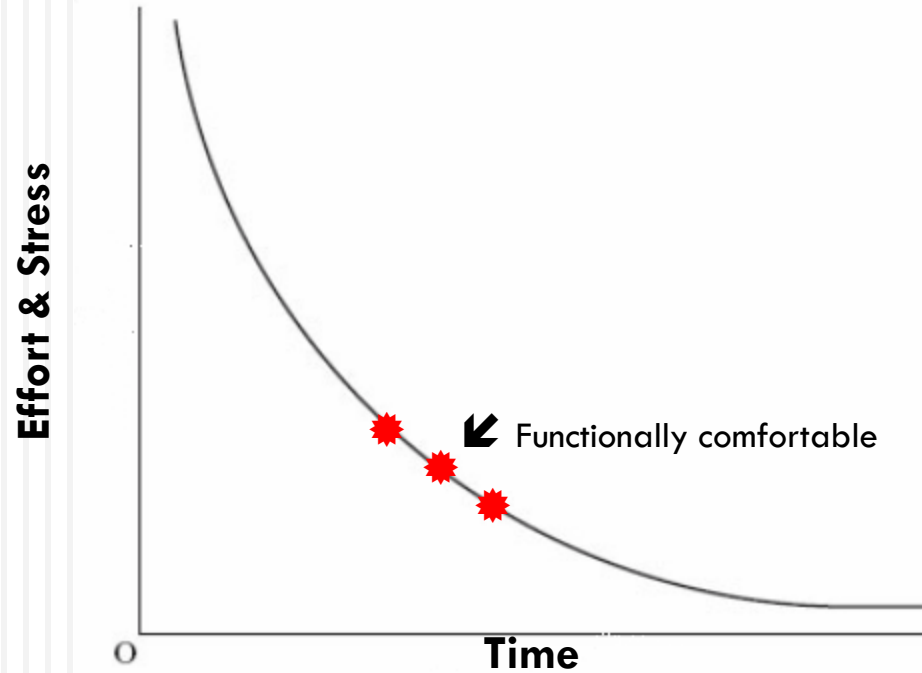

Vices

- **User interface (steep learning curve)**
- **Largely touch screen oriented**
- **Not keyboard/mouse friendly**
- **Limited Windows apps (shovelware)**

For details about Windows 8 from Microsoft engineering, see 

Learning Curve

16

Alternatives to Windows 8

Stay With an Older Version of Windows

17

Advantages

- No need to upgrade or replace hardware
- No need to upgrade operating system
- Doing nothing requires zero effort (in the short-run)
- No learning curve

Disadvantages

- Unable to take advantage of newer & developing technology
- Older versions more susceptible to viruses and malware
- Newer versions of current applications may not work well
- Support eventually ends

Waiting for “Windows 9”?

Microsoft Windows Support

18

Desktop Operating System	Latest Service Pack	End of Mainstream Support	End of Extended Support*
Windows XP	Service Pack 3	April 14, 2009	April 8, 2014
Windows Vista	Service Pack 2	April 10, 2012	April 11, 2017
Windows 7	Service Pack 1	January 12, 2015	January 14, 2020

* Extended Support is only available to commercial customers

NOTE: End of support means Microsoft will no longer provide automatic fixes, security updates, or online technical assistance

For more information on Microsoft's support, see 

Near-term Future of Windows 8

19

- **Windows 8.1 (aka “Windows Blue”) expected 2013 (no charge)**
- **Moving from Service Pack nomenclature**
- **Annual updates for products (probably with a charge)**
- **Much speculation on changes in Windows 8.1**
 - ❑ **Return of the Start button (uncertain)**
 - ❑ **Boot directly to the desktop (uncertain)**
 - ❑ **Internet Explorer 11 (almost certain)**
 - ❑ **Support for more tile sizes (almost certain)**
 - ❑ **Eliminate the desktop completely (unlikely)**
 - ❑ **Merge Windows 8 and Windows Phone 8 into a single OS (unlikely)**

For a video on “Windows Blue”, see  from Microsoft

Choices of Operating Systems

20

Something else? 

But What About Chrome OS?

21

- Based on the premise “everything you need is on the Web” See 
- Linux-based + Google Chrome
- Gmail, Google Docs, Maps, Picasa
- Local and Google Drive storage
- Hardware:
 - ❑ HP Pavilion Chromebook 14 (\$300)
 - ❑ Samsung Chromebook (\$250)
 - ❑ Google Chromebook Pixel (\$1,300)
- Okay as a “second computer”
- No significant market share

Back to...

22

The Windows Culture

23

- Some hardware brand loyalty (HP, Dell, Sony, etc.)
- Moderate to strong loyalty to the Windows OS
- Ambivalent dislike of Microsoft itself

The Apple Culture

24

- Remarkably strong brand loyalty
- Almost fan-like admiration for all things Apple (aka iZealots)
- Complaints about high prices and tight control but continue to buy

The Linux Culture

25

- The technically skilled & proud of it
- Often do-it-yourselfers, build your own computer
- Favor the open source software philosophy — software should be “free”
- Very strong loyalty to Linux
- Popular among the younger set

A Comparative Summary...

26

AN UPDATE IS AVAILABLE
FOR YOUR COMPUTER

COOL, MORE
FREE STUFF!

linux

NOT AGAIN!

mac

Equal Opportunity Disrespect

27

“I think we should release Windows 8 December 20, 2012 since the next day the Mayan doomsday apocalypse is scheduled.”

**Apple
viewpoint**

**Linux
viewpoint**

Equal Opportunity Disrespect (cont.)

28

Equal Opportunity Disrespect (cont.)

29

linux
inside

**Linux inside here too!
We'll reboot and you'll be fine**

Current Versions of Windows*

30

- Windows 8 (for Intel/AMD—desktops and laptops)
 - ❑ Windows 8 (home computers)
 - ❑ Windows 8 Pro (enthusiasts and business users)
 - ❑ Windows 8 Enterprise (corporations & government)
- Windows RT (for ARM based devices such as tablets, (e.g. Surface Tablet, Dell XPS 10, Acer Iconia W3, etc.)
- Windows Server 2012
- Windows Phone 8 (for smartphones)

*For a 24-minute video describing Windows 8, see 

Current Versions of Apple OS

31

- OS X (for desktop and laptop computers)
 - ❑ Mountain Lion (Jul 25, 2012) [\$19.99 for all your computers]
 - ❑ Lion (Jul 20, 2011)
 - ❑ Snow Leopard (Aug 28, 2009)
 - ❑ Leopard (Oct 26, 2007)
 - ❑ Tiger (Apr 29, 2005)
 - ❑ Panther (Oct 24, 2003)
 - ❑ Jaguar (Aug 23, 2002)
 - ❑ Puma (Sep 25, 2001)
 - ❑ Cheetah (Mar 24, 2001)
- iOS (for iPhone, iPad, iPod Touch and Apple TV)

Current Versions of Linux

32

- Many distributions (distros); some of the more common are*:
 - ❑ Ubuntu (Debian based)
 - ❑ Fedora (from Red Hat)
 - ❑ Linux Mint
 - ❑ Gentoo
 - ❑ PCLinuxOS
 - ❑ Red Hat Enterprise (\$49 for desktop computer)

*For more information see 

NOTE: Android OS is Linux based

Factors In Switching Environments

33

- Software availability
- Learning a new system
- Hardware costs
- Security
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- Games
- Social issues

Factors In Switching Environments

34

- **Software availability**
- Learning a new system
- Hardware costs
- Security
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- Games
- Social issues

Software Availability

35

A specific application may determine your computer environment!

- Office Functions
 - Word Processing
 - E-Mail
 - Presentations
 - Spread Sheet
- Web Browsers
- Security Software
- Games

- Office Functions
 - Word Processing
 - E-Mail
 - Presentations
 - Spread Sheet
- Web Browsers
- Security Software
- Games

- Office Functions
 - Word Processing
 - E-Mail
 - Presentations
 - Spread Sheet
- Web Browsers
- Security Software
- Games

* Much business software will only run in the PC/Windows environment

Factors In Switching Environments

36

- Software availability
- **Learning a new system**
- Hardware costs
- Security
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- Games
- Social issues

Learning a New System

37

The “Learning Curve”

From	To	Time to Functionally Comfortable (wks)*
Win7, Vista or XP	Windows 8	1-2 (least)
Win 7, Vista or XP	Apple OS X	2-3 (more)
Win 7, Vista or XP	Linux (GUI)	3-5 (most)
Win 7, Vista or XP	Linux (CLI)	<u>Very long</u>

***A personal estimate.** There will be a wide variation in the time for users to become functionally comfortable.

Factors In Switching Environments

38

- Software availability
- Learning a new system
- **Hardware costs**
- Security
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- Games
- Social issues

Hardware Costs

39

Comparing Three Reasonably Priced Computers

Computer*	CPU	RAM	Hard Drive	GPU	Price
→ 21.5 inch iMac` OS X Mountain Lion	2.7 GHz quad-core Intel Core i5. Turbo Boost up to 3.2 GHz	8 GB	1 TB 5400 RPM	NVIDIA GeForce GT 640M with 512 MB	\$1,299
→ HP Pavilion p7-1515 Desktop PC. Windows 8	Intel Core i5-3470 (3.2 GHz)	8 GB	1 TB 7200 RPM	Intel HD Graphics 2500	\$850
→ Dell Inspiron 660 Desktop PC. Windows 8	Intel Core i5-3330 (up to 3.2 GHz)	8 GB	1 TB 7200 RPM	Intel HD Integrated Graphics	\$900

* Includes monitor, keyboard and mouse.

The iMac is ~48% higher

Hardware Costs

40

- Apple hardware costs ~50% or more than the equivalent PC hardware (aka “Apple Tax”)
- Arguably Apple uses higher quality components
- The least expensive desktop Apple computer (Mac Mini) is priced at \$599 (excluding monitor, keyboard and mouse)
- The highest end, fully configured Apple computer (Mac Pro) is priced at ~\$13,000
- Linux runs on the same hardware as Windows

Factors In Switching Environments

41

- Software availability
- Learning a new system
- Hardware costs
- **Security**
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- Games
- Social issues

Security

42

PC/Windows

- Many free and for fee anti-virus/malware applications available
- Infections and intrusions infamous
- No machine should be without protection

Apple OS X

- Numerous free and for fee anti-virus/malware applications available
- Infections and intrusions rare
- Most users do without

Linux

- Some free and for fee anti-virus/malware applications available
- Infections and intrusions rare
- Most users do without

Factors In Switching Environments

43

- Software availability
- Learning a new system
- Hardware costs
- Security
- **Customer Service**
- File transfer

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- Games
- Social issues

Customer Service

44

PC/Windows

- Sales service reasonable, depending on manufacturer
- After sales vendor technical support weak to terrible
- Online support from Microsoft + monthly updates & patches*
See 

Apple OS X

- Sales service exceptional
- After sales technical support first-rate (\$)
- Online support from Apple, periodic patches + AppleCare three-year support (\$)

Linux

- Sales support identical to PC/Windows
- User groups and people networking provide technical support—weak
- For fee for some distributions (e.g. Red Hat Enterprise)

*Commercial and government customers can pay for direct support from Microsoft

User Group Support (Northern VA Area)

Customer Service

46

- Contacts for PC manufacturers (by largest market share):
 - ❑ **HP:** contact information  and online support 
 - ❑ **Lenovo:** contact information  and online support 
 - ❑ **Dell:** contact information  and online support 
 - ❑ **Acer:** contact information  and online support 
 - ❑ **Asus:** contact information  and online support 
- ❑ Contact for **Apple:** see 
- ❑ Contact for **Microsoft:** see 

Desktop PC Reliability & Satisfaction

47

Brand	Any significant problems	Satisfaction with reliability
Apple	10%	9.1
Asus	15%	8.7
Lenovo for Home	11%	8.7
Dell for Home	20%	8.6
Compaq	12%	8.6
Lenovo for Business	10%	8.6
HP for Home	17%	8.5
Acer for Home	17%	8.5
Dell for Business	18%	8.5
↑ Above average ↑		
↓ Below average ↓		
Gateway	20%	8.4
HP for Business	13%	8.4
Sony	12%	8.2
eMachines	11%	8.2

Chart notes: A "significant problem" is one that stops or seriously impairs operation of the PC during the first three years of ownership. Satisfaction scores are on a 1-to-10 scale where 1 is "extremely dissatisfied" and 10 is "extremely satisfied." The average score is 8.5.

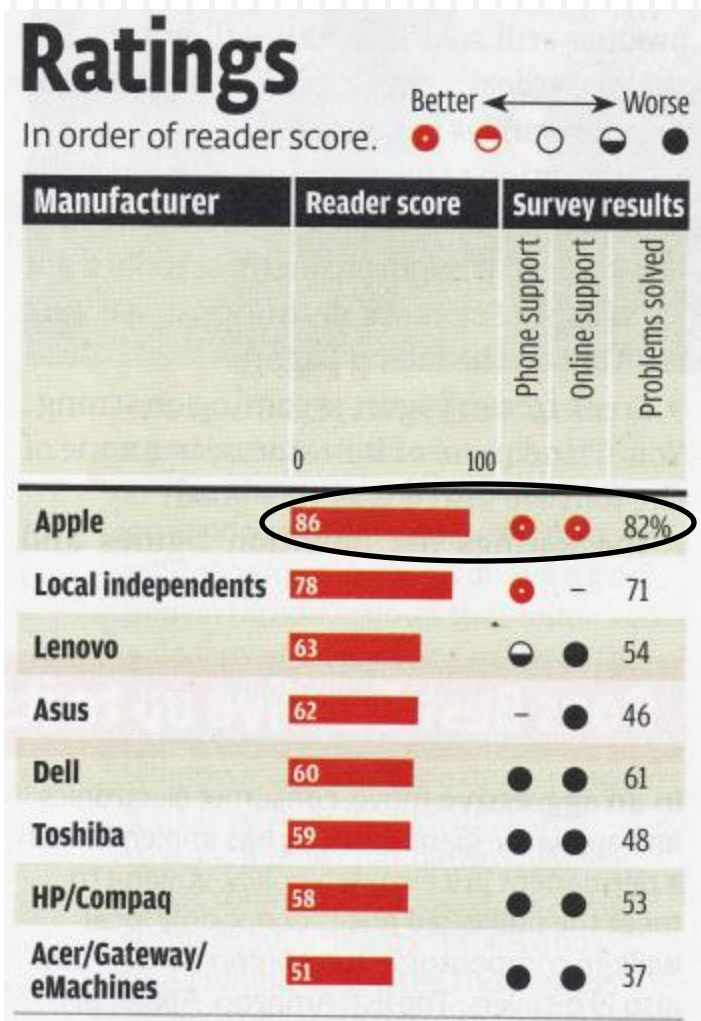

From *PCWorld*, December 19, 2012: see

Desktop PC Reliability & Satisfaction

48

From *Consumer Reports*,
June 2013, p. 7.

Factors In Switching Environments

49

- Software availability
- Learning a new system
- Hardware costs
- Security
- Customer Service
- **File transfer**

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- Games
- Social issues

File Transfer

50

From	To	Ease of File Transfer	Comments
Windows 7, Vista or XP	Windows 8	Straightforward if necessary	Via external disk drive PC to PC* or the Cloud
Windows 7, Vista or XP	Apple OS X	Reasonably straightforward	Via external disk drive, Apple's One-to-One (\$99), or the Cloud
Windows 7, Vista or XP	Linux	Reasonably straightforward	Via external disk drive or the Cloud

* Using a bridged USB to USB cable

File transfer is generally straightforward (the unexpected can happen)

Transfer can also be accomplished by using a server or NAS device if on the local network. The bigger issue is file compatibility with applications across platforms.

Factors In Switching Environments

51

- Software availability
- Learning a new system
- Hardware costs
- Security
- Customer Service
- File transfer

- **Application transfer**
- Choices of hardware
- Product design
- Cloud storage
- Games
- Social issues

Application Transfer

52

- Careful planning for application transfer is **essential!**
- Three kinds of application transfer:
 - ❑ The same application on the target OS (e.g., Microsoft Office)
 - ❑ Converting the application itself (very slow & expensive)
 - ❑ Transfer to an equivalent function (learning curve)
- Live without an application

Application Transfer (cont.)

53

- Some applications available for multiple operating systems (e.g., Microsoft Office)
 - ❑ Need to re-purchased for the target OS
 - ❑ Usually the file formats for the same application are identical across operating systems
- Generally a functional equivalent can be found for applications in various operating systems

Factors In Switching Environments

54

- Software availability
- Learning a new system
- Hardware costs
- Security
- Customer Service
- File transfer

- Application transfer
- **Choices of hardware**
- Product design
- Cloud storage
- Games
- Social issues

Choices of Hardware

55

PC/Windows

- Choice of dozens of manufacturers and hundreds of models

Apple OS X*

- 6 Laptop models
- 3 Desktop models
- 2 Tower models
- 2 Server models

Linux

- Choice of dozens of manufacturers and hundreds of models, however...

Buying new hardware without Windows can be challenging, but see 

*Apple sells its hardware and software as a bundled package. Apple does not license OS X to other manufacturers. At the time of ordering some models can be customized (CPU, RAM, SSD, HD, Graphics cards) but only memory on some models can be upgraded after sales.

Factors In Switching Environments

56

- Software availability
- Learning a new system
- Hardware costs
- Security
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- **Product design**
- Cloud storage
- Games
- Social issues

Importance of Advertising

61

Which ad sold the most jeans?

Apple Advertising (1997)

62

Albert Einstein

Alfred Hitchcock

Pablo Picasso

“Think Different”

Apple Packaging

63

Apple Packaging

64

Factors In Switching Environments

65

- Software availability
- Learning a new system
- Hardware costs
- Security
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- Product design
- **Cloud storage**
- Games
- Social issues

Cloud Storage

- Suitable for storing and exchanging small to moderate amounts of data (<10 GB)
- Applicable to mixed platform environments (PC, Mac, Linux, cell phones, tablets, etc.)
- Several dozen vendors available
- Carefully match vendors products with your needs:
 - ❑ Backup functions are not necessarily adequate for file exchange
 - ❑ File storage and exchange are not necessarily adequate as a backup strategy

Cloud Storage (cont.)

67

- Microsoft Skydrive is focused on Windows environment
- Apple iCloud is focused on Apple's products.
 - ❑ Expensive compared to the competition
 - ❑ Limited to types of files that can be stored

Cloud Storage (cont.)

Service	Clients & Apps	Max File Size	Free Storage	Price/Year	Reference
BitCasa	PC, Mac, iOS, Android	4 GB	10 GB	\$99 unlimited	
Box	PC, Mac, iOS, Android, Blackberry	250 MB or 1 GB	5 GB	\$40 for 20 GB	
Dropbox	PC, Mac, iOS, Linux, Android, BlackBerry	300 MB	2 GB	\$100 for 50 GB	
Google Drive	PC, Mac, iOS, Android	10 GB	X GB 15 GB	\$30 for 25 GB \$60 for 100 GB	
iCloud (Apple)	PC, Mac, iOS	250 MB	5 GB	\$120 for 25 GB	
MediaFire	PC, Mac, Linux, iOS Android	200 MB	10-50 GB	\$50 for 100 GB	
SkyDrive (Microsoft)	PC, Mac, iOS, Windows Phone, Android	2 GB	7 GB	\$50 for 100 GB	
Spideroak	PC, Mac, Linux, iOS, Android	No limit	2 GB	\$100 for 100 GB	
SugarSync	PC, Mac, iOS, Android, Windows Phone, Kindle Fire, BlackBerry	No limit	5 GB	\$60 for 30 GB	
Ubuntu One	PC, Mac, Linux	5 TB	5 GB	\$30 for 20 GB	

Factors In Switching Environments

69

- Software availability
- Learning a new system
- Hardware costs
- Security
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- **Games**
- Social issues

Games

- Games are a big important business; see 
- ❑ From 1980 to 2010 there were more than 5.5 billion copies of games sold
- ❑ 12 games sold 2.1 billion copies
- ❑ During this period 184 games sold 5 million or more copies each
- ❑ Thousands of games have been created

Games (cont.)

71

- Increasingly games are played on dedicated consoles, smart phones and other devices
- Most games for computers have been written for Windows
- Relatively few games for Apple OS X or Linux
- **Serious gamers should stick with Windows**

Factors In Switching Environments

72

- Software availability
- Learning a new system
- Hardware costs
- Security
- Customer Service
- File transfer

- Application transfer
- Choices of hardware
- Product design
- Cloud storage
- Games
- **Social issues**

Social Issues

- If you switch computer environments...
 - ❑ Your spouse probably won't leave you
 - ❑ You will likely participate in different user groups
 - ❑ You may lose social interaction with some individuals

Why Are We Considering Macs?

74

The Tipping Point: October 26, 2012...

Windows 8 Launches Tonight At Mid...

Why Are We Considering Macs?

75

- Steep learning curve for Windows 8 user interface
- Aging laptop
- Two aging desktop computers
- Aging Home Server
- Microsoft support for Win 7 ends Jan 2015
- Considerable time spent on maintenance (patches, malware, backups, etc.)
- Support for Microsoft Home Server ending

The Garson's Plan...

77

- Purchased MacBook Pro (April) to replace family Sony laptop
 - Evaluate MacBook/OS X — gain experience for 12-18 months
 - In late 2014 make decision as to whether:
 - ❑ Replace two desktop computers and server with two iMacs*
- OR**
- ❑ Get two new desktop computers with Windows 8 and replace the home server with NAS device

*Possibly with a NAS device

First Impressions of MacBook

78

- Very fast (2.6 GHz/i5 CPU, 8 GB RAM, 256 GB SSD)
 - ❑ Cold boot → login 18 sec
 - ❑ Shutdown 18 sec
 - ❑ Reboot → login 35 sec
 - ❑ Sleep → login 1-2 sec
- High resolution display (2650 x 1600 Retina display)
- Backup (Time Machine) is excellent

First Impressions of MacBook (cont.)

79

- Microsoft Office 2011 (for Mac)
 - ❑ Interface is different from Office 2010 on PC
 - ❑ Minor font issues
 - ❑ Identical file formats
- Mac's Mail application is functionally equivalent to Outlook, but different
- Mac's iWork '09 office suite (Pages, Keynote and Numbers) is inferior to Microsoft Office
- iCloud is Apple-centric and easy to setup and sync between Apple devices

First Impressions of MacBook (cont.)

80

- iCloud unwieldy to setup with iTunes and synch with Outlook on PC
- Cannot store Microsoft Office documents on iCloud
- Google Drive very useful to transfer files Mac to/from PC (15 GB free)
- Safari Web browser works very well on Mac
- Prefer Firefox or Google Chrome to Safari(?)

First Impressions of MacBook (cont.)

81

- Trackpad is different than mouse and takes getting used to, but very efficient
- Many useful keyboard shortcuts but takes getting used to
- Awkward going between Win-7 and OS X

First Impressions of MacBook (cont.)

82

Guardedly Positive

**...still much to learn and
surprises are to be expected**

Oh no!

83

Has he drunk the  juice?

84

Is the Garson Family Switching to Macs?

85

Thanks for coming!

Apple
Monkey

Oh ya!

Linux
Monkey
