FREE

My Needs

- Computer software that does what I want.
- The price of the software is reasonable.

My Problem

- Most “packaged” software does way more than what I need.
- Most “packaged” software costs way more than I can afford.

My Areas of Computer Needs

- Operating System
- Tech Assisting
- Protection (computer management)
- Productivity (file creation)
- Graphics/Digital Imaging
- Multimedia (audio/video)

What I've Found

- Software that costs \$\$\$\$.
- Software that's FREE.
- Free software that I like better than other free software.
- I'd like to share what I use and other examples of functional software.

FOSS

- Free and Open Source Software
- Free software vs. Open Source Software; are they the same or different? Recipes!
- Both are free, and developers are willing to share the code so that others can help re-write/improve the software (you can also donate to these people as well).
- Difference in philosophy, but I don't really understand or care. I'm just glad it's out there.

Bottom Line = \$\$\$\$

- Free programs may be missing some features.
- So far I haven't missed them, and you may not either.
- But if something is missing, then you decide if it's worth the total price of the program to have that missing feature.
- Start with the free program, if it doesn't meet your needs, purchase the paid program.

Operating Systems

- Heart/Brains of it all
- Graphical desktop
- Lots of applications

Operating Systems

- Linux^{FJ} **vs** Microsoft/Apple (type)
- Ubuntu/Linux Mint^{FJ}/Debian **vs** XP/Vista/7 or OS# (version or distro)
- Cinnamon^{FJ}, Gnome, KDE, Xfce **vs** Windows/Apple (desktop environment)

Application menu search bar

- All Applications
- Accessories
- Games
- Graphics
- Internet**
- Office
- Other
- Sound & Video
- System Tools
- Wine
- Places
- Desktop Sharing
- Dropbox
- Firefox Web Browser
- Pidgin Internet Messenger
- Skype
- Sun Java 6 Web Start
- Thunderbird Mail
- Transmission
- XChat IRC

Select an Uninstall Mode

Modes

- Built-in - run only the application's uninstaller without any additional scanning
- Safe - includes the Built-in mode and performs additional scans in the Registry and on the hard drive to find leftover items that are safe to delete. This is the fastest mode.
- Moderate - includes the Safe mode and performs an extended scan to find all of the application's leftover information in the most common places of the Registry and on the hard drive
- Advanced - includes the Moderate mode and performs a deep and thorough scan to find all of the application's leftover information in the Registry and on the hard drive. This is the slowest mode.

Henderson Hotel & Suites confirmation code: 17448523268 - Your hotel booking is confirmed.
Hotwire Itinerary: 5378824071

Dear Joan,

Thank you for booking your travel with Hotwire. We've saved this information in [your account](#). To view this saved information or print a single page receipt for your trip, sign in to [your account](#). You do not need to reconfirm with Henderson Hotel & Suites or Hotwire.

If your travel plans change, you may [add to your stay](#) at this hotel.

For your trip:

- 1 Print this page and take it with you when traveling. This confirmation shows your booking is prepaid, and it should be presented at check-in.
- 2 For information about bed types, check-in/check-out times, or for special requests, please call your hotel at the phone number listed in the contact information.

Basic Digital Camera/Photography Terms

List of terms frequently encountered in digital photography. The list is limited to some of the most common terms that relate to digital cameras and taking digital photos and is far from exhaustive. Terms more closely associated with digital photo processing are not included. At the end of the list are addresses for Web sites with additional digital photo information.

Aperture - The lens opening formed by the adjustable diaphragm inside the lens.

Aperture Priority - Exposure is calculated based on the aperture value chosen by the photographer. This allows for depth of field control (DOF). A large aperture = shallow DOF and a small aperture = deep DOF.

Aspect Ratio - The ratio of horizontal to vertical dimensions of an image. The most common aspect ratio in digicams is 4:3 so that images "fit" properly on computer screens (800x600, 1024x768, 1280x1024) and standard TV screens. Many cameras offer a 3:2 mode so that you can print 4x6-inch prints with no cropping necessary.

Back Lighting - Most light comes from behind the subject. This can cause the subject to be
