

Hard Disk Sentinel

Gabe Goldberg

gabe@gabegold.com

October 2022

Monitor/Protect Data

- Evolution: cassette, 5 ¼ and 3.5 floppies
- ...then rotating memory hard drives
- SSDs increasingly replace rotating drives
- Hard drives and SSDs taken for granted
- They reliably/rapidly save/fetch data
- Until – uh oh, something's wrong

Hard Disk Sentinel (HDS)

- I use on two computers: tower and laptop
- Constantly monitors drive health
- Reports ultra-details on structure/operation
- Supports
 - Rotating hard drives
 - Solid state drives (SSD)
 - Hybrid (rotating plus SSD) drives
 - Memory cards, thumb drives, RAID controllers

Display

- I configure taskbar icon for each drive
 - One on laptop, two on tower (internal, external)
 - Shows temperature green/orange/red
 - Mouse over displays drive health summary
 - Click icon opens comprehensive display

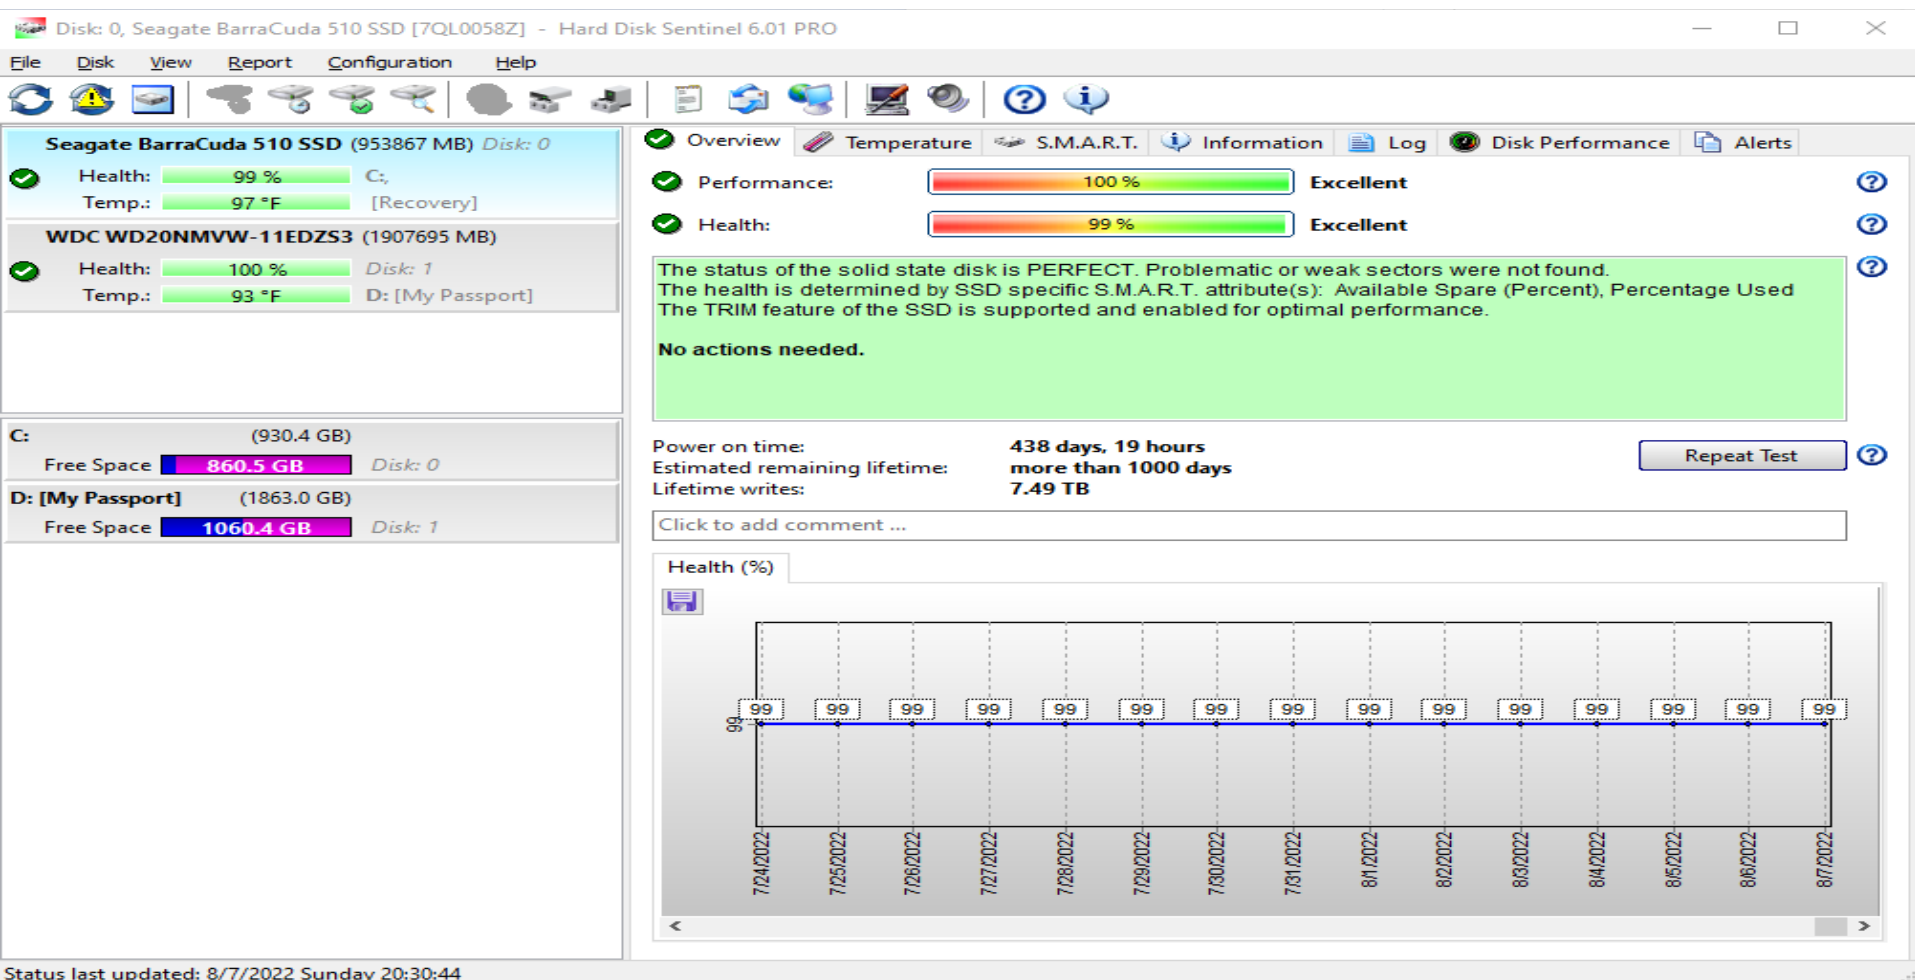

```
Disk: #1 - WDC WD20NMVW-11EDZS3 - D: - OK
Hard Disk Temperature: 93 °F
Health: 100 %
```

HDS Comfort Level and Details

- Desired summary: The hard disk status is **PERFECT**. Problematic or weak sectors were not found and there are no spin up or data transfer errors. No actions needed.
- Can explore drive history: temperature patterns, various errors, performance information, and much more.

HDS Main Display -- SSD

2/7/2022	3.970	3,970,000,000	130,000,000	6	21,666,667
2/17/2022	4.150	4,150,000,000	180,000,000	10	18,000,000
2/27/2022	4.330	4,330,000,000	180,000,000	10	18,000,000
3/16/2022	4.690	4,690,000,000	360,000,000	17	21,176,471
4/10/2022	5.200	5,200,000,000	510,000,000	25	20,400,000
4/22/2022	5.430	5,430,000,000	230,000,000	12	19,166,667
5/23/2022	6.060	6,060,000,000	630,000,000	31	20,322,581
6/24/2022	6.630	6,630,000,000	570,000,000	32	17,812,500
7/26/2022	7.180	7,180,000,000	550,000,000	32	17,187,500
9/5/2022	8.020	8,020,000,000	840,000,000	41	20,487,805

- SSDs wear out, have finite write capacities
- Investigate excessive writes, indicated by decreasing health

Crucial Storage Executive

Software that helps optimize performance of Crucial SSD: This free downloadable tool enables Crucial SSD to be even faster and allows it to get periodic updates so it's performing at its best. With Storage Executive, you can see how much storage is used, download latest firmware, monitor drive temperature, reset encryption password, and enable Momentum Cache feature, which makes many SSD operations up to 10x faster

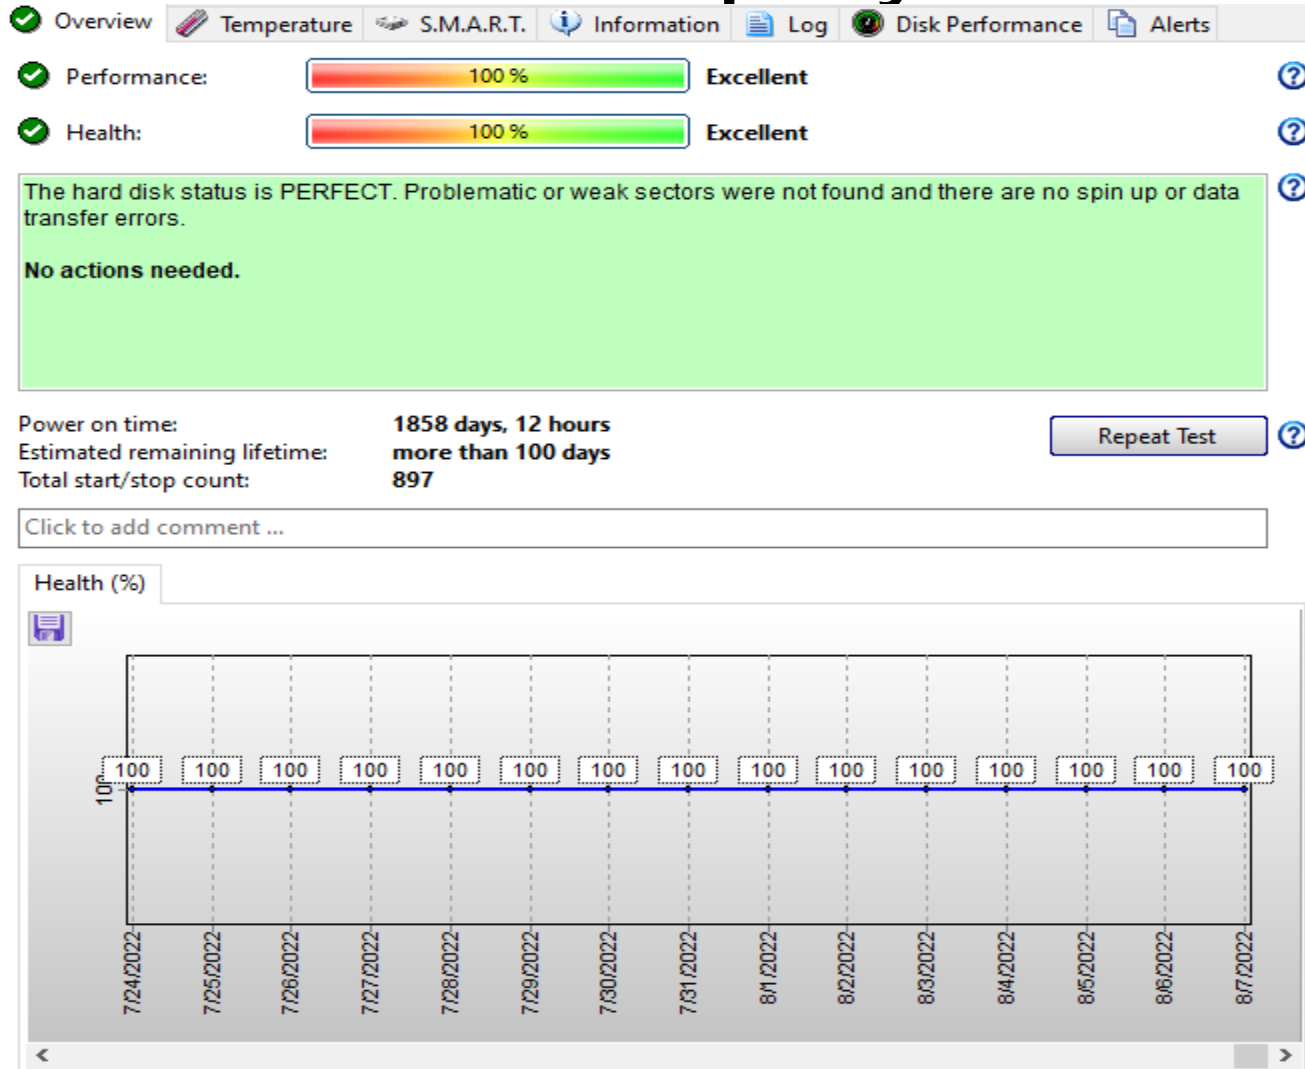

Benefits of Storage Executive:

- Enable Momentum Cache feature to make many operations up to 10x faster
- Download latest firmware
- See how much storage is used
- Monitor SSD operating temperature and overall health
- Reset SSD encryption password
- Verify SSD's model number for warranty claims
- Clear data stored on drive

Crucial Storage Executive

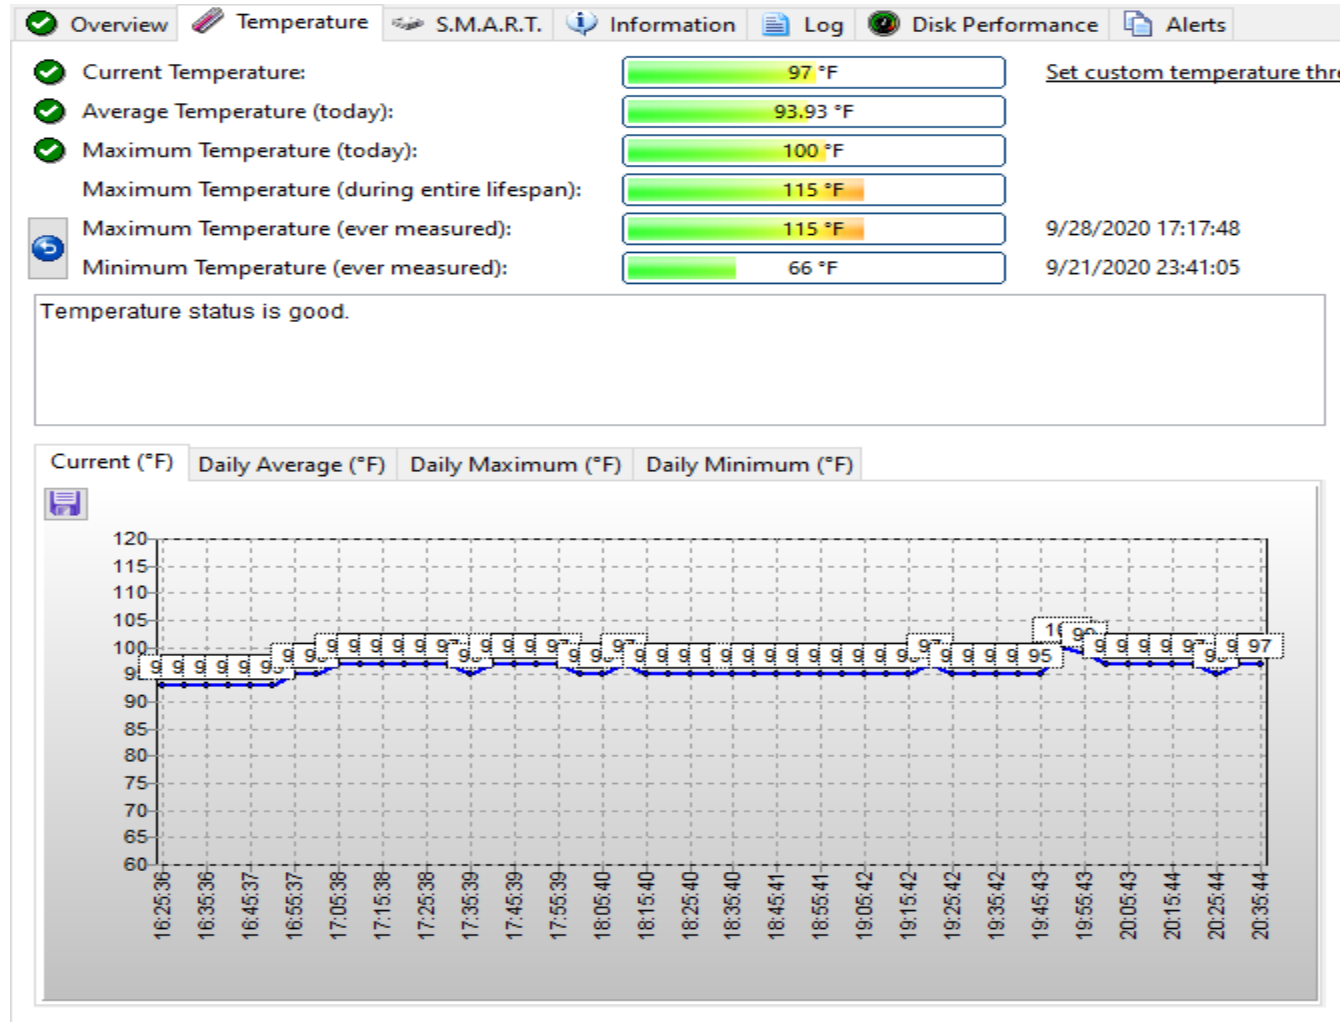

The screenshot displays the Crucial Storage Executive web interface. At the top left is the Crucial logo with 'by Micron' underneath. The main title 'Storage Executive' is centered. In the top right corner, there are links for 'Help', 'About', and 'Contact Support'. A left-hand navigation menu contains several options: 'System Information', 'Drive Details', 'S.M.A.R.T.', 'Firmware Updates', 'Sanitize Drive', 'Format Drive', 'PSID Revert', 'Momentum Cache', 'Flex Capacity', 'Over Provisioning', and 'Device Self-Test'. The main content area shows system details for 'GABES-W10-DESKTOP' (IP: 192.168.1.150, OS: Windows 10 Pro, 64-bit). It features two gauge charts: 'Physical Memory' at 8.05GB of 15.95GB and 'Virtual Memory' at 12.99GB of 18.33GB. Below these is a green health indicator for the SSD 'mtinvme7QL0058Z - Good Health' (Seagate BarraCuda 510 SSD ZP1000CM30001), with an 'S.M.A.R.T.' button. Further down, it lists the serial number '7QL0058Z', firmware revision 'STPSC014', and drive capacity '1.00 TB' with an 8% usage bar.

HDS Information Display

The screenshot shows a software window titled "HDS Information Display" with several tabs: Overview, Temperature, S.M.A.R.T., Information, Log, Disk Performance, and Alerts. The "Information" tab is active, displaying the following data:

Hard Disk Summary	
Hard Disk Number	0
Interface	NVMe
Disk Controller	Standard NVMe Express Controller (PCI\CC_010802) [VEN: 1BB1, DE...
Disk Location	Bus Number 0, Target Id 0, LUN 0
Hard Disk Model ID	Seagate BarraCuda 510 SSD
Firmware Revision	STPSC014
Hard Disk Serial Number	7QL0058Z
Total Size	953867 MB
Power State:	Active

Logical Drive(s)	
Logical Drive	C: []

Properties	
NVMe Standard Version	1.3
PCI Vendor ID (VID)	0x1BB1
PCI Subsystem Vendor ID (SSVID)	0x1BB1
IEEE OUI Identifier	CF-24-00
Recommended Arbitration Burst (RAB)	1
Multi-Interface Capabilities	0
Maximum Data Transfer Size	512 (9)
Abort Command Limit	4
Asynchronous Event Request Limit	4
Number FW Slots Support	7
Maximum Error Log Page Entries	63
Total Number Of Power States	5
Admin Vendor Specific CMD Format	1
Submission Queue Entry Size	Max: 64, Min: 64
Completion Queue Entry Size	Max: 16, Min: 16

Why HDS?

- Drives include S.M.A.R.T. monitor
 - Detect/report drive reliability indicators
 - Anticipate drive failures
 - But most operating systems don't support
 - Warnings about failing drives: Norton, HDS
 - HDS maintained by dedicated developer
 - Passionate about product, brilliant support
 - Bargain price for multiple systems, lifetime support
 - Pro version includes portable tool
 - Smaller Linux version

<https://www.hdsentinel.com>

Hard Disk Sentinel (HDSentinel) is a multi-OS SSD and HDD monitoring and analysis software. Its goal is to find, test, diagnose and repair hard disk drive problems, report and display SSD and HDD health, performance degradations and failures. Hard Disk Sentinel gives complete textual description, tips and displays/reports the most comprehensive information about the hard disks and solid state disks inside the computer and in external enclosures (USB hard disks / e-SATA hard disks). Many different alerts and report options are available to ensure maximum safety of your valuable data.

No need to use separate tools to verify internal hard disks, external hard disks, SSDs, hybrid disk drives (SSHD), disks in RAID arrays and Network Attached Storage (NAS) drives as these are all included in a single software. In addition Hard Disk Sentinel Pro detects and displays status and S.M.A.R.T. information about LTO tape drives and appropriate industrial (micro) SD cards and eMMC devices too. See the How to: monitor Network Attached Storage (NAS) status for information about hard disk monitoring in Network Attached Storage (NAS) devices.

<https://www.hdsentinel.com/>

Hard Disk Sentinel monitors hard disk drive / HDD status including health, temperature and all S.M.A.R.T. (Self-Monitoring, Analysis and Reporting Technology) values for all hard disks. Also it measures the disk transfer speed in real time which can be used as a benchmark or to detect possible hard disk failures, performance degradations.

HDSentinel is the perfect data protection solution: it can be effectively used to prevent HDD failure and SSD / HDD data loss because it has the most sensitive disk health rating system which is extremely sensitive to disk problems. This way even a small HDD problem can't be missed. The Professional version has scheduled and automatic (on-problem) disk backup options to prevent data loss caused by not only failure but by malware or accidental delete also.
